

SYSTEM AND METHOD FOR AGGREGATING DATA HAVING DATA AND  
APPLICATION DEPENDENCIES

ABSTRACT OF THE DISCLOSURE

5

A system for aggregating data having data and application dependencies. The system includes a set of the applications, the set including independent and dependent applications; and an aggregation client, communicatively coupled to the set of applications and to an aggregation server, the aggregation client capable to map dependencies of the set of applications, request and receive data for updating the independent applications, and update dependent applications when independent applications that are depended on are updated with received data.
